Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Claims 1-2 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 3/29/05.

Claim Objections

2. Claims 3-7 objected to because of the following informalities: Claim 3 line 8 the L shaped illustrations used to describe the shape of the openings should be changed to a literary description along with the description of the rest of the structure.. Appropriate correction is required.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3-7 rejected under 35 U.S.C. 103(a) as being unpatentable over Hurlbutt in view of Boehm et al.

Regarding claim 3 Hurlbutt discloses applicants prior method of assembly a brake booster with which applicant is well familiar.

Lacking are the first and second arcuate projections and radially spaced tabs on the first shell.

Art Unit: 3683

Boehm et al. Teach a similar design to that of applicants at numerals 5-9. It also seems from the discussion in col. 1 lines 43+ over to the top of col. 2 that Boehm seeks to achieve the same objective as applicants describe at page 2 lines 28+ of their specification.

To have modified the booster of Hurlbutt with the slot –tongue arrangement taught by Boehm et al. would have been obvious to the ordinary skilled worker in the art at the time of the invention for the reasons discussed in Boehm et al., namely to prevent unwanted separation of the two shells during the operational life of the booster. Applicant's claimed arrangement is merely an alternate equivalent arrangement to the combined teachings of the references above. Note Boehm et al. Shows that the shape and depth of the slots and tabs may vary in the several embodiments.

The limitations of claims 4-7 are considered only to be minor obvious alternative equivalents in view of the teachings above.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher P. Schwartz whose telephone number is 703-308-0576. The examiner can normally be reached on M-F 9:30-6:00.
